

CASE STUDY

Commercial

CLIENT:
KS Oil Factors Ltd.

SITE:
Green Lane, Oldham.

Acting on behalf of a waste operator, Hourigan Connolly secured detailed planning permission on a former industrial site for a waste oil processing plant in Oldham. The plant recycled waste cooking oil from local

businesses for use in biodiesel products.

The consenting process entailed extensive negotiations with the Public Protection Team at Oldham Council and the sensitive management of local stakeholders following a

campaign and petition against the proposals.
